Sealant product shall be supplied in approximately 30 pound (13.6 kg) completely meltable packages that are interlocked stacked on pallets containing 1950 pounds (885 kg) of product. Approximately 65 packages are palletized and enclosed in a corrugated container. The packages and palletized unit shall be water and weather resistant so that outside storage is permissible.

Individual packages consist of three (3) approximately 10 pound (4.5 kg) blocks which are partially wrapped in a block liner. The three blocks are stacked in alternating directions and wrapped in a shrink wrap to form one package. Each package has a printed fully meltable label in accordance with OSHA, GHS and ASTM requirements. The individual packaging shall quickly melt into the product at normal sealant melt temperatures without affecting product installation characteristics or specification conformance and not be more than 0.50% of the product weight.

NoBox sealant products are sold by the pallet only and individual packages are not intended or labeled for individual sale.

The packaging shall have the following properties:

<b>Block Liner</b>	
Thickness (ASTM D1777)	0.0015 inches (0.38 mm) minimum
<b>Package Shrink Wrap</b>	
Thickness	100 gauge
<b>Corrugated Container</b>	
Double Walled	
Burst Strength	275 lb/in <sup>2</sup> (1.90 MPa) minimum
