

# EZ Pour 50

## Melter/Applicator

*EZ Pour 50 shown with optional pour pot, sold separately*

### Specifically Designed for Small Projects

#### Machine Specifications

Specification	PN 40199
Vat Capacity	50 gallons
Melt Capacity	400 lbs per hour
Heat transfer oil required	18 gallons at 70°F
Tank Construction	Double boiler type
Tank opening size	14-3/4" x 12-3/4"
Maximum heat input	Vapor Burner 185,000 BTUs
Burner & Temperature Control	Automatic -Fail safe
Engine Briggs & Stratton	Single cylinder Propane 3 BHP @ 3600 RPM
Drive Mechanism	All hydraulic with infinite forward and reverse action
Mixer	Full sweep mixer with 2 blades
Axle	2250lbs capacity
Tires	ST 175/80 D13 (1360lbs capacity each)
Dry Weight	Approximately 1500lbs
Propane Bottle	100lbs

Crafcó's experience in the pavement preservation industry has developed one of the most reliable and efficient melter/applicators available. The EZ Pour melter features a one-hour heat-up time, which get crews into production fast and easy. The internal design of the EZ Pour melter handles packaged material trouble-free and heats up and applies all hot-applied sealant. The precision engineering and construction of the melter make it trouble-free, safe to operate with the lowest operating cost in the industry.

There are many safety features such as the splash-proof lid, curb side loading material and agitator controls which keep the operator safe. The low profile of the melter makes loading sealant easy. The Crafcó EZ Pour is a flush-free clean-up system, which requires no solvents and is designed for the operator and production.
