SEALANT LAB MELTER

BIG MELTER, LITTLE EFFORT.

Designed to meet ASTM Spec D5167

ENGINEERED SAFETY

Delivering Confidence Through Innovation, Quality and Value Since 1976
The Crafco Lab Melter is designed to heat sealant in the lab with minimum effort.

**HOT-APPLIED PAVEMENT CRACK & JOINT SEALANT LAB MELTER**
This melter incorporates automatic electronic temperature controls and gauges as well as ASTM oil bath agitation system.

**ASTM COMPLIANCE**
This melter is designed for testing labs to be compliant to the ASTM heating, mixing and agitation requirements.

**LOW MAINTENANCE**
A unique removable sample can system does away with messy cleanups and material contamination possibilities. Heat the sealant and throw away the can. It’s just that simple.

**HEATING MECHANISM**
Two 4700 watt, 240 volt fire rods submerged in an oil bath for even heating throughout the samples.

**CONSTANT AGITATION**

**ELECTRONIC TEMPERATURE CONTROLS**
The melter incorporates automatic temperature controls and gauges for ease of operation.

**REMOVABLE SAMPLE CAN SYSTEM**
Removable can system does away with messy cleanups and material contamination possibilities.
