

Action Pave Acrylic Coatings

Performance Matters.

Action Pave Acrylic Coatings are the trusted choice for excellent results that stand the test of time. The superior suspension properties of Action Pave allow for uniform mix design across any size project, ensuring even color and aggregate dispersal. Formulated for both concrete and asphalt, Action Pave bonds firmly to the substrate and subsequent layers for reliable performance both during and after installation. From start to finish, Action Pave Acrylic Coatings set the standard for quality.

BENEFITS

Vibrant UV Stabilized Color Options

Durable Impact Resistant Coatings

Excellent Coverage Rates

Easy Application and Clean-up

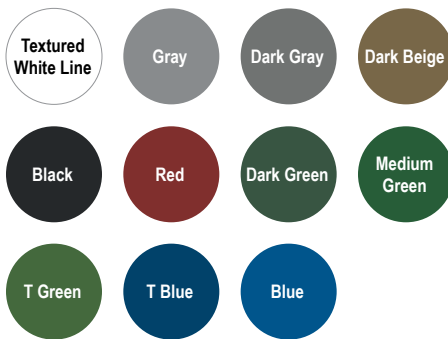

ITF Certified For Speed Of Play

The Action Pave Advantage

Standard Colors

ProPalette™ Colors

*Custom Colors Available

Available Sizes

55 and 30 Gallon Drums, 5 and 1 Gallon Pails

Action Pave Acrylic Coatings by CrafcO are engineered for outstanding quality and unmatched durability. Made with 100% acrylic resins, vibrant color-fast pigments and reinforcing mineral fibers, Action Pave provides smooth installation, easy cleanup and excellent coverage. Simple maintenance, UV-stable color, and exceptional wear resistance ensure years of trouble-free enjoyment for tennis courts, basketball courts, pickleball courts, hockey/in-line skating and other play areas. When it comes to athletic surfaces, performance really is everything.

FEATURE	BENEFIT
Acrylic/Latex Emulsion Coating	Provides strong chemical and mechanical bonding between layers for reliable performance.
Excellent Mixing & Suspension	Stable color and aggregate dispersion ensures uniformity of coatings over large areas and ease of installation.
High Material Coverage Rates	Lower material costs.
UV Stabilized	Long lasting vibrant colors.
EFT -Enhanced Filler Technology	Increases the impact resistance and toughens the playing surface to provide excellent long term structural performance.
Designed for Asphalt and Concrete	Reduces inventory requirements. Does not require structural reinforcement materials.
Hard & Cushion Surface Formulations	Meets and exceeds most customer surfacing requirements.
Custom Colors Available	Allows for unique surface design and graphic options.
ITF Certified	Certified by ITF for speed of play.
