

Crack-Vac 2™

Crack Cleaning Without the Dust

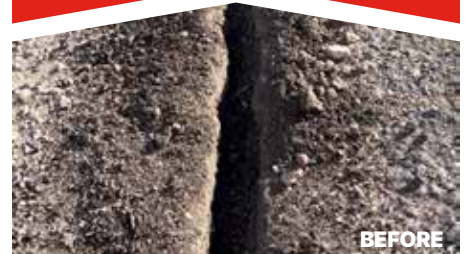

The Crack-Vac 2™ by Crafcro is a revolutionary pavement crack cleaning system designed to remove dirt and debris from cracks with maximum efficiency and minimal dust. Airborne dust can be a breathing hazard and may violate environmental regulations. The Crack-Vac 2 quickly removes loose debris from cracks without generating airborne dust, thanks to an innovative combination of compressed air and vacuum pressure in an ergonomic wand. Prepare cracks the easy way with the Crack-Vac 2.

BENEFITS

Efficient crack cleaning without airborne dust

Maximizes crack sealant longevity

Enhances worker safety and environmental compliance

Efficient Crack Cleaning Solution

EZ-Glide Wand &
4-Caster Head

Cyclone Separator

HEPA Filter (exceeds
OSHA standards)

100 Gal Debris Holding
Tank w/ Hydraulic Dump

FEATURES

Removes debris with compressed air and vacuum pressure

Vacuum head on casters for easy movement

Three-stage filter system

Wide working radius

Hydraulic tank lift for easy cleanout

Skid or trailer mounts

Avoid repeated exposure to silica dust during pavement work. The Crack-Vac 2, featuring a three-stage filter system that exceeds OSHA standards for occupational exposure limits, ensures clean, safe operation by virtually eliminating dust clouds during crack cleaning.

The EZ Glide wand reduces operator fatigue, while compressed air nozzles and powerful vacuum pressure work together to loosen and remove debris. A three-stage filter system captures dust down to 0.3 microns, protecting your crew and your community.
