FEATURES

- Flexible sealant properties to account for pavement movement
- Durable sealant properties to support heavy traffic and harsh weather
- Waterproof sealant properties that eliminate infiltration of water, chemicals, sand, debris into sub-base
- Exceptional adhesion sealant properties that bond to Asphalt Cement Concrete & Portland Cement Concrete pavements
- Long-term solution (5+ years performance)
- Engineered design in premeasured package for consistency and maximum performance; no field blending means better consistency, better performance and reduces errors and labor
- Easy installation
- Reduce crew and equipment
- No compaction needed
- Accomplish more with less

Mastic One® — Polymer-modified asphalt, pavement repair mastic
Mastic One® & Mastic One® Type 2 - Pavement Preservation Products

Mastic One®

Mastic One® is a hot-applied, pourable, aggregate filled, black color, self-adhesive, pavement repair mastic used for preserving, maintaining and repairing asphalt, Portland Cement Concrete pavement and bridge deck surfaces. Composed of highly modified polymer asphalt, Mastic One® is designed for large cracks and distressed surface areas too small for re-paving.

Mastic One® Type 2 is ideally suited for cooler climates; may not be suitable for some applications where pavement temperatures exceed 158° F.

Ideally used for:
- Filling wide cracks and joints
- Filling potholes
- Sealing utility cuts
- Leveling depressed thermal cracks
- Repairing deteriorated longitudinal joints
- Skin patch repairs
- Leveling manhole covers
- Leveling bridge deck approaches
- Pretreatment of fatigue cracked areas prior to surface treatments
- Filing spalls, popouts, and corner breaks
