

EZ Paint Mixer

Self-Propelled Bulk Mixing

Improve your company's productivity, quality and safety with the EZ Paint Mixer. The self-propelled EZ Paint Mixer effortlessly transports up to 244 gallons of materials from the staging area to the work area without the spills and mess associated with other mixing methods and equipment. The EZ Paint Mixer's compact design allows the unit access even the most limited worksites.

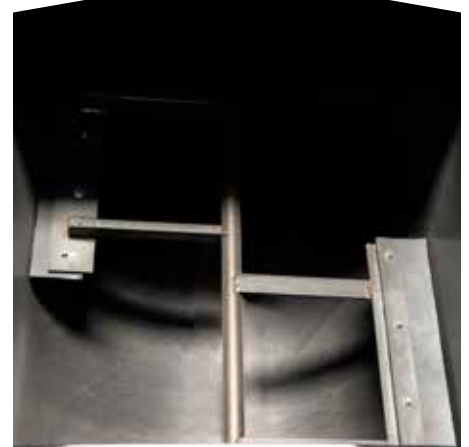

BENEFITS

Calibrated full sweep mixing of materials

Ability to access challenging job sites

Power to mix materials with high viscosity and fillers

Increases productivity

Powerful, Mobile Paint Mixing

The EZ Paint Mixer combines power, mobility and safety to make any paint or industrial coating project easier. A high-torque hydraulic drive powers through viscous fluids and added fillers. Get precise mixing control for proper material performance with the EZ Paint Mixer's variable speed agitator and full-sweep mixing paddles.

Transporting material is a breeze with the steerable self-propulsion system and electronic braking. The innovative tank design allows for quick color changes and cleanup, reducing downtime and keeping the job site tidy.

The EZ Paint Mixer is handcrafted using high-quality materials for heavy-duty use, with a standard 2-year warranty.

FEATURES

- Self-propelled, towable trailer
- Intuitive controls
- 244 gallon capacity
- Variable speed, full-sweep agitation

APPLICATIONS

- Paint
- Sport surface coatings
- Industrial Coatings
