

HP ER Enhancer

Produce Cold Patch Safely and Profitably

Transform your business with Crafco's **HP ER Enhancer** program, a revolutionary cold patch recipe coupled with expert support from Crafco. HP ER Enhancer is an organic, no-VOC viscosity modifier with a proprietary blend of rejuvenating and adhesion-promoting additives used to produce Crafco's HP ER Asphalt Cold Patch. It's designed to offer safer, more cost-effective cold patch production using any hot mix plant or pugmill. Thanks to a higher flash point and lower binder content requirement than conventional formulas, HP ER Enhancer reduces both physical and financial risks for producers. Crafco even provides on-site analysis and guidance to ensure you get the results you want. Start making cold patch the easy way with Crafco HP ER Enhancer.

BENEFITS

Safer production

More profitable

No equipment upgrade required

Expert support from Crafco

High-performance Cold Patch

UNIQUE ATTRIBUTES

Eco-friendly formulation

High flash point for safety

Comprehensive support from Crafcó's design and production teams

Compatible with all types of asphalt plants, including drum plants, batch plants, and pug mills

Requires lower binder content than conventional formulas

Lower temperature processing saves fuel

FEATURES

Mix HP ER Enhancer with paving grade asphalt to produce HP ER Binder – the key ingredient in Crafcó's HP ER Asphalt Cold Patch. Our no-VOC formula has a higher flash point than conventional cutback blends and can be processed at a lower temperature, reducing fire risk and saving burner fuel. HP ER Enhancer is safe to use in all hot mix production plants, including drum or batch, as well as cold mix pugmills. It also requires lower binder content, meaning a higher yield and more profit.

- Crafcó provides on-site support throughout the process. When you're ready to blend, our engineers will provide AC integrating analysis and instructions. And when you're ready to start production, they'll provide an aggregate analysis & asphalt mix design.
- HP ER Enhancer is packaged in premeasured totes for easy shipping and storage, allowing it to be shipped globally for cold patch production anywhere with asphalt blending capabilities.
- The result is a high-performance, eco-friendly asphalt binder with rejuvenating properties, excellent adhesion, and a long shelf life.
