What sets the Super Sealcoater apart? Quality construction, thoughtful design and numerous standard features that are usually considered options.

- Tank and frame constructed of thick steel and engineered to prevent cracking or rust
- Chain-driven horizontal agitator with rubber wipers on each paddle provides close sweep agitation and prevents sediment buildup
- Large loading hatch with screw-down locking knob, inner splash lid, and serrated grating to easily open sandbags
- Large 2" diaphragm pump and piping with easy-access filters for maximum flow and no clogging
- Includes 30-gallon 20CFM compressor and 300PSI abrasion-resistant hose with 100' hose reel and 72" aluminum application wand
- Available in 550-gallon tank trailer-mount and 800-gallon tank skid or trailer-mount configuration
- Trailers feature torsional axles for less maintenance, storage deck with ramp and fenders with integrated steps

Your Crafcro representative will provide hands-on training to help you get the most out of your Super Sealcoater.
