

**Sealcoating essentials – gloves, caution tape, squeegee, brushes, cones, etc.**

**Gloves**

Pick the gloves needed for the paving project you are working on; rubber coated, disposable nitrile gloves, mechanics gloves, and more.

**Caution Tape**

Quickly block off the area where you will be sealcoating.

**Squeegees**

When hand applying pavement sealer, using a squeegee will give you a smooth, professional result.

**Brushes**

For thorough sweeping of asphalt and concrete before applying black-top sealant.

**Cones**

Use traffic control devices such as cones, diverters or drums to help control the flow of traffic near the jobsite.
