

Tack Tank

Smarter Application Starts With a Better Tank

Crafcro Tack Tanks are designed to help you get the job done fast and frustration-free. With more standard features like a reversible pump, in-cab control and adaptable spray bar, Crafcro Tack Tanks solve common problems that can slow you down. Available in both 300 gallon and 600 gallon sizes, everything about our Tack Tanks is built to meet the toughest standard: yours.

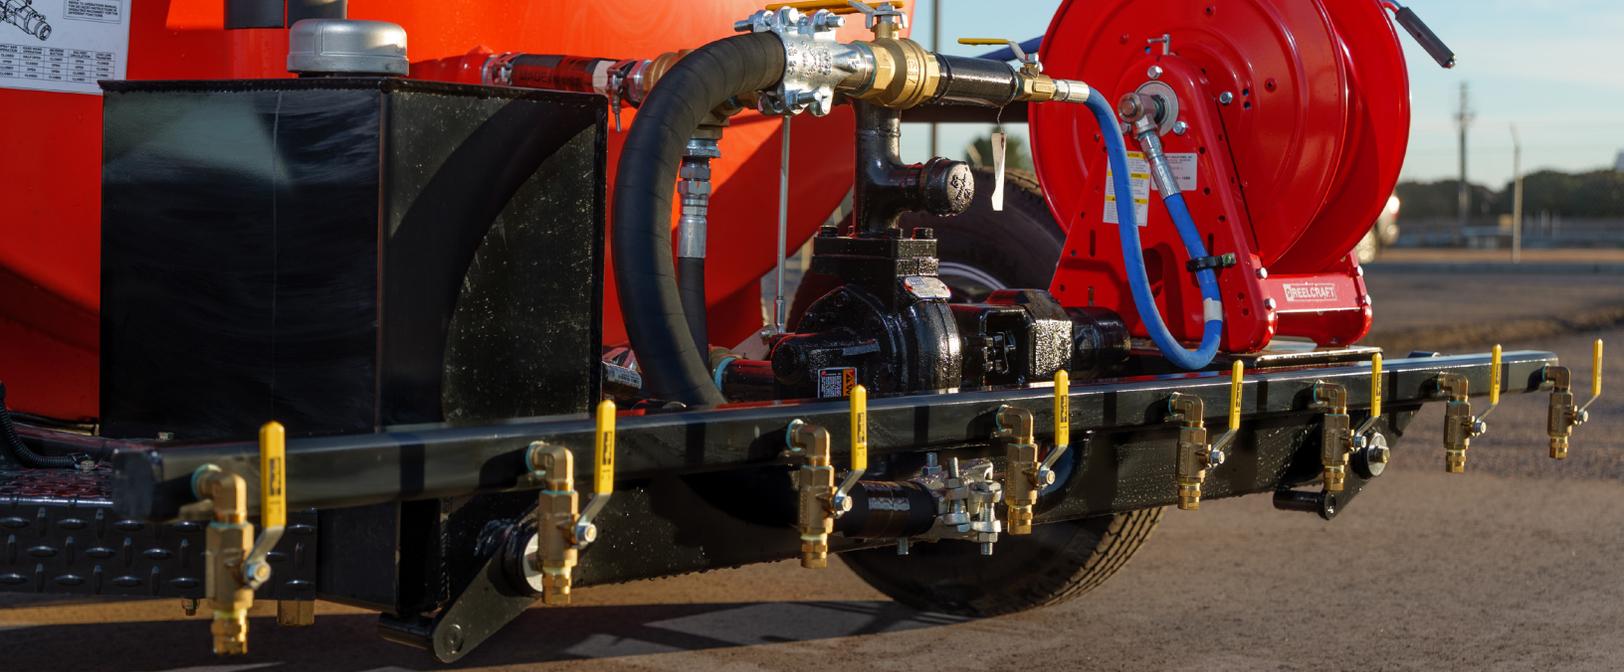

BENEFITS

Innovative control
and adaptability

2,250 lbs. (300 gal.)

2,850 lbs. (600 gal.)

Spray System

40' hose

5' wand

8' bar

Manhole

20"

Solvent Tank

5 gal.

Crafcro Tack Tanks make your job easier, with innovative features that come standard on every machine.

- Unique control system uses tow vehicle's headlight switch to activate sprayer.
- Two-position spray bar extends beyond the driver's side fenders to avoid curbing wheels.
- Efficient triple-pass flue tube speeds up material heating.
- High-output pump delivers 35 gallons per minute, allowing for a wide range of job types.
- Pump is hydraulically driven, allowing the engine to start freely every time – even when the pump is full of material.
- Pump can be reversed to reclaim material back into the tank, allowing easier cleaning.
- DOT-rated manhole cover helps you get to the job safely.
- Dished and flanged tank heads increase structural strength and allow the tanks to be welded from the inside without overlapping welds.
