

Need a boost in performance? Try one of our sealer additives

STAR MACRO-FAST® - MS170110

This specialty-polymer, latex-based additive speeds sealer dry time without changing the mix design. Based on acrylic co-polymers, fast-evaporating solvents, and specialty chemicals. Does not increase viscosity.

STAR MACRO-FLEX® - MS170115

A true, rubberizing, acrylonitrile/butadiene (A/B), latex-based additive, this product significantly improves the toughness, flexibility, and durability of sealers. *STAR MACRO-FLEX also meets FAA Specifications.*

STAR ADVANTAGE-4® - MS170125

Leverage the advantages of this high-potency, acrylic emulsion-based additive, and get the benefits of several products in one: fast drying, performance-boosting, color-enhancing, and viscosity-building.

STAR MAX-DRI™ - MS170120

Open pavement up quicker! For refined tar and asphalt emulsion sealers, this additive provides for better sand suspension and durability, while speeding drying time by up to 75%.
